DETAILED ACTION

Information Disclosure Statements

The information disclosure statements (IDS) submitted on March 22, 2004, May 13, 2004, August 2, 2004, December 9, 2004, December 21, 2004, and October 11, 2005 were each filed after the mailing date of the Application on December 15, 2003. The submissions are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosch et al (U.S. Patent No. 6,115,847) in view of Christoffel et al (U.S. Patent Application Publication No. 2002/0087137).

Application/Control Number: 10/735,978 Page 3

Art Unit: 3761

With respect to Claims 1,4,5,7,16-18,24,25: Rosch teaches an active wear trunk garment 110 having a liquid-permeable trunk cover 114 having inner surface 111 and outer surface 113 and a waste containment structure 142 comprising a liquid-impermeable backsheet 158 having a garment-facing surface, a liquid-permeable bodyside liner 156 and absorbent core 160 sandwiched therebetween. ('847, Col. 8, lines 8-16) Trunk cover 114 has front waist, rear waist and crotch regions 131,133,149 as can be seen in Figs. 1-4. As can also be seen in Figs. 1-4, waste containment structure 142 is disposed generally within trunk garment 110. Rosch teaches that trunk cover 114 is joined to elastic members 143,145 at the waist regions ('847, Col. 10, lines 45-49), therefore Rosch does not teach that trunk cover 114 is releasably attached at the front and rear waist regions.

Christoffel teaches a girl's swimsuit wherein an absorbent pant/bottom portion 98 is releasably attached to the upper portion/bodice 42 at the front and rear waist areas via hook and loop fasteners 92 to secure the pant portion and upper portion about the waist of the wearer and for greater ease in applying and removing said swimsuit, ('137, ¶¶ 0071-0074) therefore it would be obvious to one of ordinary skill in the art to utilize hook and loop fasteners to releasably attach the outer cover 114 and garment 110 taught by Rosch so as to more easily apply and remove garment 110 as taught by Christoffel.

With respect to Claim 2: Rosch teaches leg openings defined by seams 187,189 in cover 114. ('847, Col. 11, lines 1-5) As can best be seen in Fig. 4, garment 110 has leg openings spaced apart inwardly from leg openings defined by cover 114.

With respect to **Claim 3:** Rosch teaches leg elastics 136,138 for pant structure 112. ('847, Col. 12, lines 25,26) Cover 114 is in the form of swimming trunks and as can best be seen in Fig.4 is designed to hang loosely about the legs of the wearer.

With respect to **Claims 6,11:** As can best be seen in Fig. 4, the crotch region of garment 110 is located inwardly of the crotch region 149 of cover 114 and not attached. Further, Rosch teaches cover 114 is configured as a pair of swimming trunks, wherein said trunks, as stated previously are intended to hang loosely about the legs of the wearer, whereas the garment contains leg elastics to fully encircle the legs of the wearer.

With respect to **Claims 8,9:** As can best be seen in Fig. 4, Rosch teaches that garment 110 has a waist opening defined by waist regions 131 and 133 corresponding to the waist regions of cover 114.

With respect to Claim 10: Rosch teaches pant structure 112. ('847, Col. 12, line 5)

With respect to **Claims 13,14:** Since Rosch teaches both non-refastenable and refastenable side seams ('847, Col. 11, lines 1-5, 14,15), though Rosch does not teach using them in combination, it would be obvious to one of ordinary skill in the art to modify said side seams so as to contain both refastenable and non-refastenable portions, for example having a non-refastenable portion located above fasteners 96 on each side seam, including a configuration in which the refastenable portion of each side seam comprises 25-50% of the length of the seam.

With respect to Claim 15: Please see the rejection of claim 1 in addition to the following: Rosch teaches that cover 114 has front panel 115 and back panel 121 having side edges 117 and 119 (front) and 123 and 125 (back). ('847, Col. 10, lines 57-65)

With respect to **Claims 19-21:** Rosch teaches pant structure 112 having left and right side panels 126, 128 respectively that extend from the front waist region 120 to the rear waist region 122. ('847, Col. 12, lines 4-12) Panels 126,128 are ultrasonically bonded and have non-refastenable seams so as to allow fastening of a front side panel to a corresponding back side panel, thus defining leg openings, as can be seen in Figs. 5,6. ('847, Col. 12, lines 18-21) As can also be seen in Figs. 5 and 6 pant structure 112 has front and back panel areas in addition to the side panels.

With respect to Claims 22,23: Since Rosch teaches that the side panels are elastomeric and are capable of stretching to between 10-500% of their original length ('847, Col. 8, lines 55-60), Examiner is asserting that they are capable of creating an overlap in the range set forth by applicant in claim 23 (thus also falling within the range set forth in claim 22), in both the cases of non-refastenable and refastenable seams.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie J. Hand whose telephone number is 571-272-6464. The examiner can normally be reached on Mon-Thurs 8:00-5:30, alternate Fridays 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tatyana Zalukaeva can be reached on 571-272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
